

# *Contents*

1. Historical Aspect	1
2. Introduction	5
3. How Noninvasive Ventilation Works	19
4. Indications of Noninvasive Ventilation	25
5. Contraindications of Noninvasive Ventilation	33
6. Key to Success	37
7. Types of Noninvasive Ventilation	41
8. Modes of Noninvasive Ventilation	49
9. Equipment of NIV: Ventilator	55
10. Equipment of NIV: Interface and Accessories	65
11. Care of NIV Equipment	75
12. IPAP, EPAP and CPAP	81
13. Starting NIV	93
14. Monitoring during NIV	107
15. Weaning from NIV	113
16. Advantages, Disadvantages and Complications of Noninvasive Ventilation	121
17. Efficacy of NIV	131
18. Failure of NIV	137
19. NIV as a Weaning Mode	141

20. NIV in Special Situations	151
21. NIV in Neuromuscular Diseases	161
22. NIV at Home	175
23. NIV in Children	183
24. Long-term Noninvasive Ventilation	195
25. Problems in NIV	203
26. Selection of Best Noninvasive Equipment and NIV Set Up	209
27. Respiratory Failure	219
28. ABG in A Nutshell	231
29. Self-Assessment Quiz and Interesting Clinical Situations	237
30. General Considerations	251
Annexure: Equipment of NIV-Ventilator, Interface and Accessories	267
