|--|-----------|
| <b>Chapter 1: Assessment of Strabismus</b>                   | <b>1</b>  |
| ■ History  | 1         |
| ■ Examination  | 2         |
| <b>Chapter 2: Refractive Errors</b>                          | <b>12</b> |
| ■ Hypermetropia  | 12        |
| <i>Normal Development of the Refractive State of the Eye</i> | 12        |
| <i>Optics of Hypermetropia</i>                               | 13        |
| ■ Myopia   | 17        |
| <i>Etiology</i>  | 17        |
| <i>Optics</i>  | 18        |
| <i>Symptoms</i>  | 18        |
| <i>Management</i>  | 19        |
| ■ Astigmatism  | 23        |
| <i>Causes</i>  | 23        |
| <i>Optics</i>  | 23        |
| <i>Symptoms</i>  | 24        |
| <i>Management</i>  | 24        |
| <b>Chapter 3: Amblyopia</b>                                  | <b>26</b> |
| ■ What is Amblyopia?   | 26        |
| <i>Etiology</i>  | 26        |
| <i>Clinical Types of Amblyopia</i>                           | 27        |
| <i>Management of Amblyopia</i>                               | 29        |
| ■ Occlusion Therapy  | 31        |
| <i>Part-time Occlusion Therapy</i>                           | 31        |
| <i>Full-time Occlusion Therapy</i>                           | 32        |
| ■ Cycloplegic Drugs  | 33        |
| <b>Chapter 4: Essential Infantile Esotropia</b>              | <b>35</b> |
| ■ Essential Infantile Esotropia                              | 35        |
| <i>Clinical Features</i>                                     | 36        |
| <i>Risk Factors for Developing Infantile Esotropia (ET)</i>  | 36        |

- **Dissociated Vertical Deviation** 36
  - Clinical Features* 37
  - Management of DVD* 38
  - Differential Diagnosis of Essential Infantile Esotropia* 38
  - Examination* 39

## Chapter 5: Esotropia

42

- **Fully Accommodative Esotropia** 42
  - Clinical Features* 42
  - Management* 43
- **Partially Accommodative Esotropia** 44
  - Clinical Features* 44
  - Management* 45
- **Near Esotropia** 45
  - Measurement of Accommodative Convergence/Accommodation ratio* 45
  - Management* 46
- **Distance Esotropia** 46
- **Secondary Esotropia** 47
  - Management* 47
- **Consecutive Esotropia** 47
  - Management* 47

## Chapter 6: Exotropia

49

- **Intermittent Primary Exotropia** 49
  - Examination* 50
  - Management* 50
- **Constant Primary Exotropia** 51
  - Early Onset Exotropia* 51
  - Decompensated Intermittent Exotropia* 51
  - Examination* 51
  - Management* 51
- **Secondary Exotropia** 52
  - Management* 52
- **Consecutive Exotropia** 52
  - Management* 53

## Chapter 7: A and V Patterns

55

## Chapter 8: Paralytic Strabismus

58

- **Characteristics** 58
  - Aims of Examination* 59
  - Etiology* 59

- **Third Nerve Palsy 60**
  - Neuro-ophthalmic Examination 61*
  - Aims of Examination 61*
  - Differential Diagnosis 62*
  - Investigations 63*
  - Management 63*
- **Superior Division Palsy 64**
  - Muscle Sequelae 64*
  - Characteristics 64*
  - Management 65*
  - Double Elevator Palsy/Superior Division Palsy 65*
  - Clinical Presentation 66*
- **Inferior Division Palsy 67**
  - Characteristics 67*
  - Management 68*
  - Fourth Nerve Palsy 71*
  - Diagnosis 71*
  - Differential Diagnosis: Sudden Onset Fourth Nerve Palsy in an Adult 72*
  - Investigations 73*
- **Sixth Nerve Palsy 74**
  - Surgical Anatomy of the Sixth Nerve 75*
  - Localization of Site of Sixth Nerve Palsy 75*
  - Management 77*

## **Chapter 9: Restrictive Strabismus**

**78**

### **Duane's Retraction Syndrome 78**

- **Surgical Plan 81**

### **Brown's Syndrome 83**

*Differential Diagnosis 84*

### **Fibrosis Syndrome 86**

### **Strabismus Fixus 86**

### **Thyroid Eye Disease 86**

- **Signs and Symptoms of Thyroid Eye Disease 88**
  - Proptosis and pseudoptosis 88*
  - Lid Retraction, Lid Lag and Glabellar Furrows 89*
  - Corneal and Conjunctival Findings 89*
  - Orbital Muscle Involvement 89*
  - Increased Intraocular Pressure 90*
  - Cutaneous Findings 90*
  - TED Classification 90*

- NOSPECS 90
- Outpatient Management 92
- Sight-threatening Disease 92
  - Medical Treatment for Moderate-to-Severe Disease* 93
- Overview of Surgical Intervention 93
  - Orbital Decompression* 94
  - Strabismus Surgery* 95

## Chapter 10: Basic Surgical Principles

97

- Surgical Anatomy 97
  - Physiology of Extraocular Muscles* 101
  - Factors Affecting the Surgical Outcome* 102
- Management Plan in Strabismus 105
  - Surgical Options in Esotropia* 105
- Exotropia 107
  - Intermittent Exotropia* 107
  - Alternate XT with Deviation Equal for Near and Distance Fixation* 107
  - Postoperative Follow-up* 109
- SURGICAL COMPLICATIONS 109
  - Intraoperative Complications* 110
  - Early Postoperative Complications* 111
  - Late Postoperative Complications* 112

## Chapter 11: Case Presentations

114

- Case 1: Congenital Bilateral Sixth Nerve Palsy 114
- Case 2: Acute Traumatic Unilateral Sixth Nerve Palsy 115
- Case 3: Constant, Unilateral Esotropia in an Infant 115
- Case 4: Alternating Esotropia 116
- Case 5: Constant, Partially Accommodative Esotropia 117
- Case 6: Consecutive Exotropia 119
- Case 7: Lost Lateral Rectus Muscle 120
- Case 8: Congenital Fibrosis of Extraocular Muscles 121
- Case 9: Traumatic Inferior Division Palsy of the Third Nerve 121
- Case 10: Double Elevator Palsy 122
- Case 11: Intermittent Exotropia 123
- Case 12: Dissociated Vertical Deviation (DVD) 124
- Case 13: Constant Exotropia 125
- Case 14: An Alternating Exotropia with A V-Pattern 126
