| <i>Prefixation of Cytological Material</i> | 15 |
| <i>Rehydration of Air-dried Smears</i> | 15 |
| <i>Factors Affecting Fixation</i> | 15 |
| <i>Fixation of Individual Tissues</i> | 16 |
| <i>Softening Hard Tissues</i> | 17 |
| 2. Decalcification | 18 |
| <i>Types of Bone and Decalcification</i> | 18 |
| <i>Bone Techniques</i> | 18 |
| <i>Methods of Decalcification</i> | 20 |
| <i>Endpoint of Decalcification</i> | 23 |
| <i>Factors Affecting the Rate of Decalcification</i> | 25 |
| <i>Morphometry of Bone</i> | 25 |
| 3. Tissue Processing | 27 |
| <i>Tissue Sampling</i> | 27 |
| <i>Principles of Tissue Processing</i> | 27 |
| <i>Initial Precautions Before Processing</i> | 28 |
| <i>Stages of Tissue Processing</i> | 28 |
| <i>Automated Tissue Processing Methods</i> | 35 |
| <i>General Considerations During Processing</i> | 39 |
| <i>Tissue Recovery Procedures</i> | 39 |
| <i>Tissue Processing Methods</i> | 40 |
| 4. Tissue Embedding | 45 |
| <i>Embedding Tissues in Paraffin Wax</i> | 45 |
| <i>Technique of Embedding</i> | 46 |
| <i>Different Methods of Embedding</i> | 46 |
| <i>Paraffin Oven or Incubators</i> | 48 |
| <i>Orientation of Specimens, While Embedding</i> | 48 |
| <i>Tissue Marking Substances</i> | 48 |
| <i>Alternative Embedding Media</i> | 49 |

Embedding Technique 52

Double Embedding and Double Infiltration Methods 53

5. Microtomy 55

Historical Aspects 55

Principles of Microtomy 55

Classes of Microtomes 56

Care of a Microtome 62

Microtome Knives: Types and Parts 63

Care of a Microtome Knife 67

6. Section Cutting 72

General Principles of Microtomy 72

Paraffin Section Cutting 72

Frozen Section Cutting 77

Procedure for Ultramicrotome 78

7. Introduction to Staining and Principles of Staining 79

Types of Staining 79

Classification of Stains 79

Methods of Staining 81

Metachromatic Staining 81

Theories of Staining 82

Principle of Staining Methods 83

Types of Differentiators 83

Hematoxylin and Eosin Stain 84

8. Special Histochemical Stains 96

Histochemical Staining 96

Mucicarmine Stain 99

Alcian Dyes 100

Periodic Acid-Schiff's Reaction (Schiff's Leucofuchsin) 103

Combined Alcian Blue and PAS Reagent 106

Stains for Glycogen 107

Stains for Sulfated Acid Mucins 109

Other Stains to Detect PAS-positive Acid Mucins 110

Use of Metachromasia in Mucin Stains 112

Connective Tissue Stains 112

Special Stains for Microorganisms 126

Stains for Pigments and Minerals 137

Practical Applications of Histochemical Techniques 145

9. Special Biopsies 149

Kidney Biopsy 149

Liver Biopsy 151

Muscle Biopsy 153

Nerve Biopsy 155

Brain Biopsy 158

Endomyocardial Biopsy 160

Bone Marrow Trephine Biopsy 162

Testicular Biopsy 163
